DRUPAL easy

Wide Range of Options

Wide Range of Options

- Upload

- Image

- Imagefield

- IMCE

- Server-side image processing

Upload Module

- Upload module

- Drupal core
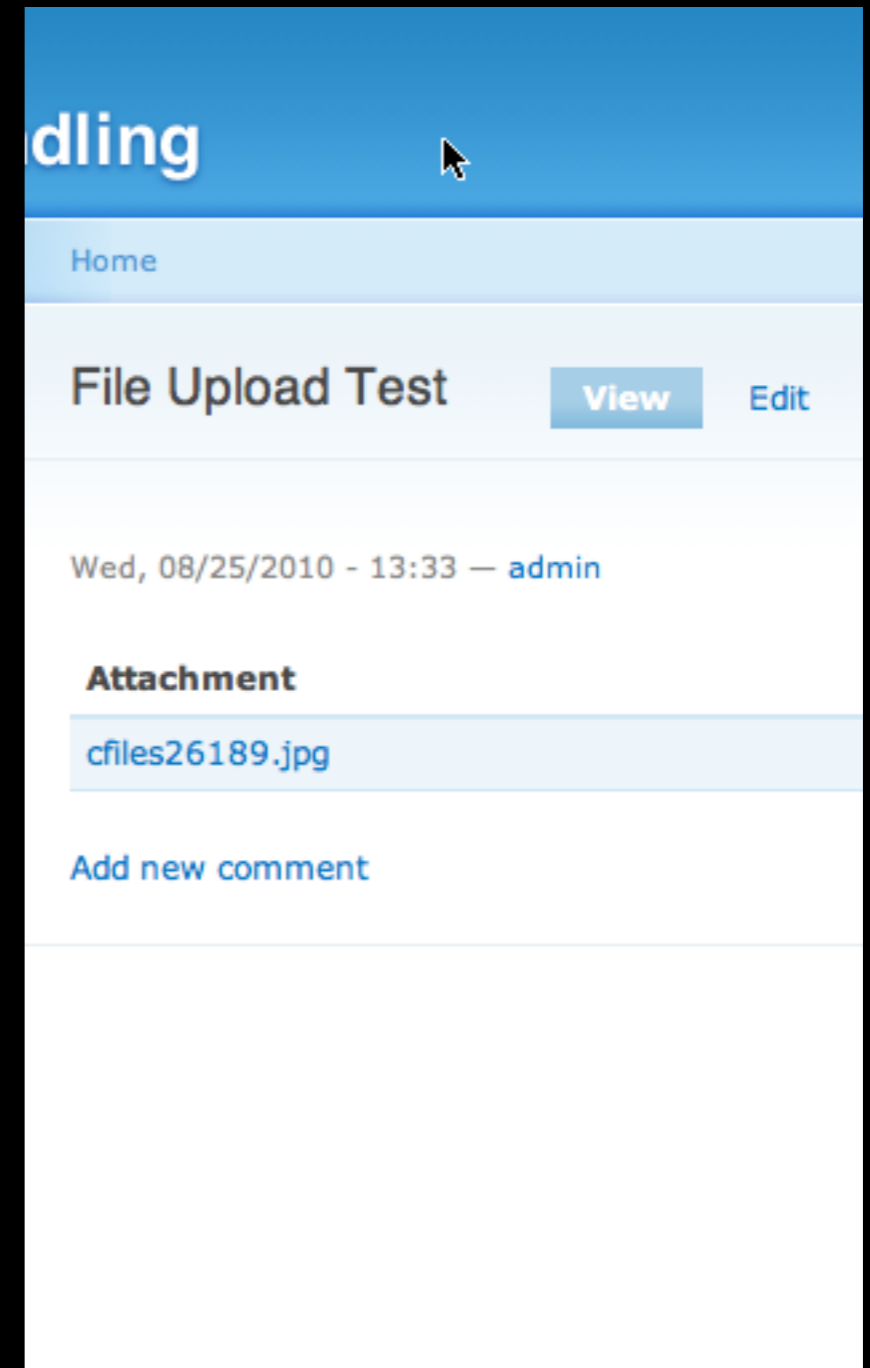

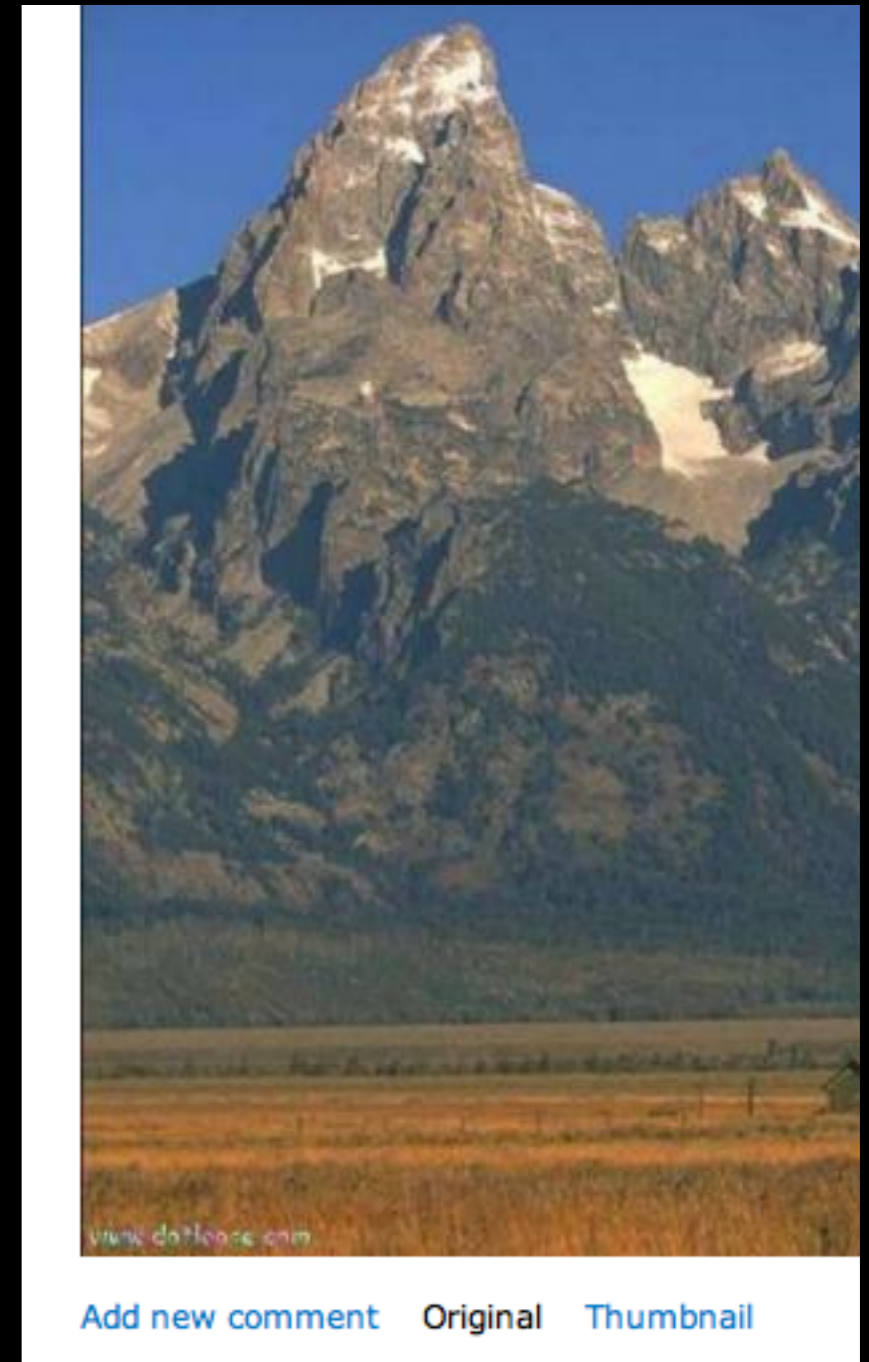

- No automatic image display

Image Module

- Drupal.org/project/image

- Automatic thumbnails

- Creates image nodes comes with several add-on modules (image attach, image gallery)

Add new comment   Original   Thumbnail

Imagefield Module

- Drupal.org/project/imagefield

- CCK

- Very powerful when used in combination with ImageCache (Drupal.org/project/imagecache)

Imagefield:

Add new comment

IMCE and WYSIWYG Modules

- Drupal.org/project/imce, Drupal.org/project/wysiwyg

- Nice interface

- Image placement control

- Does not utilize Imagefield

Body:

Image Resize Filter

- Drupal.org/project/ image_resize_filter

- Drag to resize images in the WYSIWYG editor
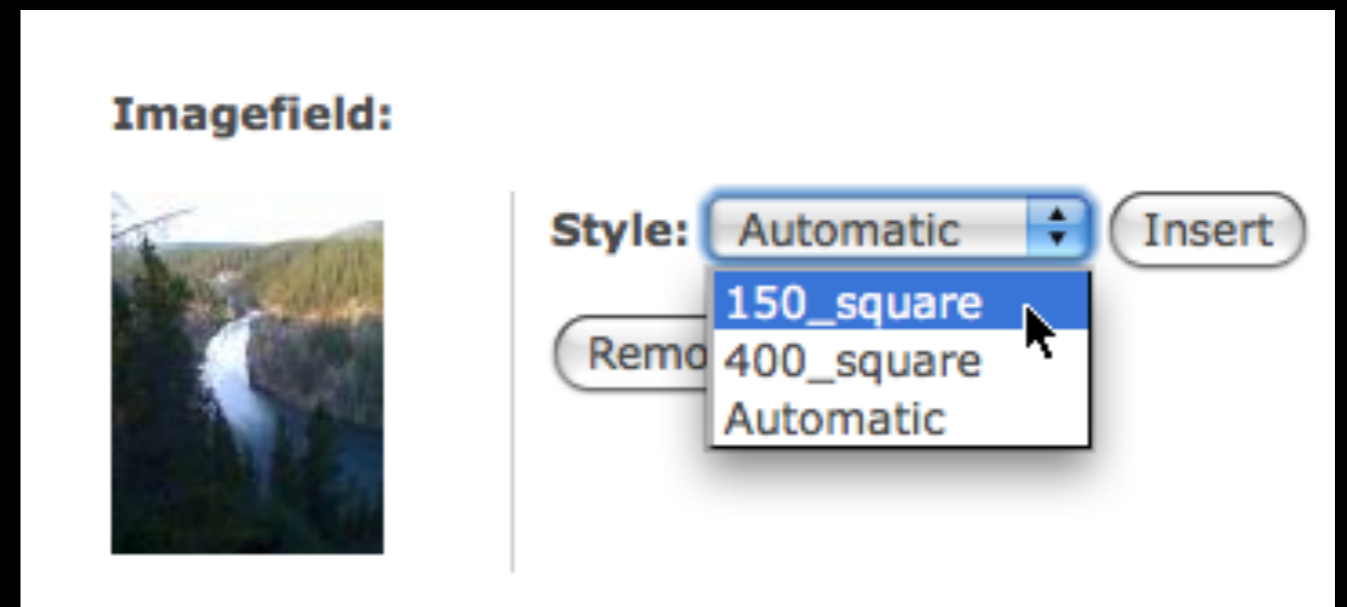

- Leverages IMCE and ImageCache

Imagefield Crop

- Drupal.org/project/
  imagefield_crop

- Drag to resize and
  crop images in the
  browser

- Operates outside of
  the WYSIWYG editor

Insert Module

- Drupal.org/project/insert

- Select ImageCache preset to resize image

- Resized image sent to WYSIWYG editor

Imagefield:

Style: Automatic | Insert

150_square

Remo | 400_square

Automatic

Lightbox Module

- Drupal.org/project/lightbox2

- Slick way for end-users to view full-size images

More!

- Thickbox

- Colorbox

- Imagefield Javascript Crop
